About the Company

- Founded by MIT and Samsung alums, Neighbors is an enterprise focused insurtech disrupting the protection plans market.
- Headquartered in Seattle, with offices in Atlanta and Houston, Neighbors currently has a team of 15 and is expanding rapidly.
- We are backed by an A.M. Best* rated insurance company with an A- (Excellent) rating. All of our protection plans carry the backing and assurance of a large and well-established insurance company and the modern, easy-to-use technology developed by Neighbors.
- Hosted on AWS and leveraging AI technologies, our state-of-the-art warranty management platform is fast, highly reliable, and easy-to-use. You can access it using desktop or mobile devices at anytime and from anywhere.

Transforming Your Warranty Management: A Phased Approach* (Actual Implementation May Vary)

Phase 1: Immediate Implementation

- **Claims Website & AI Chatbot:** Launch a comprehensive website accessible on both desktop and mobile, with white labeling if desired. The site will be equipped with an AI-driven chatbot for automated customer assistance.
- **Customer Care Call Center:** Establish a dedicated call center to handle inquiries and guide customers through the claims process.
- **Logistics Management:** Automate the sending of shipping labels, receive damaged devices, conduct triage, and manage the return of repaired or replacement units efficiently.

Phase 2: Advanced Program Development

- **Device Management Program:** Develop a tailored program for managing devices that don't require immediate repairs. Options include storing and refurbishing devices for future use or selling them on the open market.
- **Extended Warranty Offerings:** Introduce extended warranties as an option for added customer assurance and revenue generation, building on the established robust warranty framework.
- **Advanced AI Features:** Collaborate on developing advanced AI features that leverage customer data, such as vision-based damage detection, inventory forecasting for spare parts, and predictive maintenance, to enhance operational efficiencies and predictive capabilities.

Flexible Partnership Models: Tailored to Your Needs

	TPA*-Only	TPA + Repairs	Comprehensive Service
Neighbors' Role	• Claims Processing • Policy Management • Customer Service • Data Analytics and Reporting	• Manages both TPA aspects and repairs	• Handle <i>ALL</i> aspects of the warranty service including admin, repairs, and financials
OEM's Role	• Manages repairs and budget	• Manages budget	• Funds the warranty programs and relies on Neighbors for end-to-end management
Advantages	• Focused Expertise: OEM retains complete control over repairs and budgeting, while Neighbors optimizes customer interactions and claims efficiency, reducing operational load and enhancing customer satisfaction.	• Operational Efficiency: Solum streamlines operations by offloading day-to-day logistical tasks, enabling sharper focus on financial oversight and strategic growth. This model reduces overhead costs associated with repairs and personnel management.	• Complete Delegation: Solum delegates all operational responsibilities, freeing up resources to concentrate on core business activities. This partnership ensures Solum can leverage Neighbors' full suite of services for maximum efficiency, scalability, and customer loyalty without increasing internal complexity or costs.

*TPA = Third Party Administrator for Claims Processing, Policy Management, and Customer Service

Why Neighbors.ai?

Streamline Efficiency: Streamline warranty management with our AI-driven platform, reducing costs and complexity while increasing operational efficiency.

Boost Customer Loyalty: Deliver exceptional service that not only satisfies but delights your customers, enhancing loyalty and strengthening brand reputation.

Unlock New Revenue Streams: Utilize advanced AI analytics to predict maintenance needs and optimize spare parts management, creating new opportunities for revenue and ensuring resource efficiency.

Expand Capabilities: Extend your capabilities without extending your overhead. Our flexible service models adapt to your growth and changes, supporting you every step of the way as you expand your market presence and customer base.
